DETAILED ACTION

Priority

A national stage application filed under 35 U.S.C. 371 may not claim benefit of the filing date of the international application of which it is the national stage, as in applicant's declaration, since its filing date is the date of filing of that international application. Stated differently, since the international application is not an earlier application (it has the same filing date as the national stage), a priority claim in the national stage to the international application is inappropriate. See MPEP § 1893.03(c).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 3747

Claims 1, 2, 4-7, 9, 10, 12 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Bolenz et al. An arrangement with a belt driven motor/generator is shown in Figure 4. The starting function is controlled according to engine temperature as disclosed at column 3, lines 34-59.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 8, 11, 13, 14 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bolenz et al in view of Dyches et al. Bolenz et al discloses the claimed invention as stated above except for detecting a failure to start. Dyches et al teaches that it is known to provide an engine starting system with means for detecting a failure to start. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the starting system of Bolenz et al to include means for detecting a failure to start, as taught by Dyches et al, in order to protect the starting system from excessive cranking.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shiroyama et al discloses an engine starting system wherein a starting motor and a motor generator are controlled according to operating conditions.
